

SCANNER

5

ABSTRACT OF THE DISCLOSURE

10       The scanner has a body having a scanning unit, a  
display device, a keypad, a holding member holding  
together the display and the keypad, a mounting structure  
for mounting the holding member to the body, and a cable  
holder having a holding part for holding a plurality of  
cables and arranged in a floating state at one of the  
keypad and the display. The cable holder has two side  
15 walls and a bottom wall, with grooves at the tops of the  
side walls. Cables are arranged in the grooves and  
pressed by a part of the holding member when the holding  
member is attached to the display device and the keypad.
